

The Great Global Warming Swindle

Introduction

Watch the short video and discuss the following matter in pairs.

"What do you know about global warming?"

"Why is it said that humans are causing it?"

Vocabulary

meteorological

nitrogen

correlation

small portion

sunspot

minor

coincidence

a multitude of

temperature variation

water vapor

take A as B

Listening 1

Watch the video about solar activity and answer the following difficult questions.

1. What correlation did the scientists find?
2. Why did the scientists examine 400 years of astronomical records?
3. Why is the discovery so important?

Listening 2

Watch the video about water vapor once and catch what is being said. Then, watch it again and fill in the blanks.

...If you take CO₂ as a percentage of _____,
the oxygen, the nitrogen, the argon or so on, it's _____ percent...

...Although CO₂ is a green house gas, _____ only
form _____ the atmosphere. What's more, CO₂ is a
relatively minor greenhouse gas...

...Water vapor is a green house gas, _____
greenhouse gas.

Discussion

Discuss the following questions at the same time in pairs.

"Do you still think that global warming is caused by humans?"
